

To insert a figure we use graphicx package:

Figure 1: Kitten image

2nd method is to use hfill:

Figure 2: Girl and flower

Figure Wrapped by Texts:

Like a table as stated in 7.8 on defined in the wrapfig package. The wrapfigure environment, which creates a spacpage 68, a figure can also be wrapped around by texts, which is done through the wrapfigure environment³ defe for inserting a figure, takes one optional and two mandatory arguments, i.e., beginwrapfigure[aline]asideasize, where aside is the location of the space (l for left side or r for right side), while asize is the size of horizontal space and aline is the number of lines of texts for vertical space. If insufficient number of

Figure 3: Girl.
